

ABHIRAM P

M.Tech Cyber Security Student | Aspiring SOC Analyst / Security Engineer

Kochi, Kerala, India | +91 93883 38881 | code.abhiramp@gmail.com | [linkedin.com/in/abhiram-pulliyampatta](https://www.linkedin.com/in/abhiram-pulliyampatta)

PROFESSIONAL SUMMARY

M.Tech Cyber Security student at CUSAT with hands-on experience in Python, Linux, networking, MERN stack, and secure application development. Interested in cybersecurity, network security, SIEM, PKI, API security, and cloud security. Seeking cybersecurity, SOC Analyst, Network Security, or Security Engineer roles.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL

Frameworks: React, Express, NodeJS, Flutter, Flet

Tools & DB: MongoDB, MS Office, VS Code, BeautifulSoup, Selenium, GitHub, IDS/IPS, Wireshark, Burp Suite, OWASP Top 10, Nmap, SIEM, Kali Linux, Metasploit, Network Security

Operating Systems: Linux, macOS, Windows

WORK EXPERIENCE

Full Stack Intern — ICT, Kozhikode

Jan 2025 – Mar 2025

- Developed a MERN stack job portal supporting separate employer and job seeker workflows.
- Designed a responsive UI using React, Tailwind CSS, Bulma, and Material UI.
- Integrated Clerk authentication and MongoDB Atlas for secure user management.
- Reduced manual recruitment workflow by automating job posting and application tracking.

PROJECTS

Electric Load Forecasting using Machine Learning

Python, LSTM, XGBoost, Random Forest, Pandas, NumPy, Scikit-learn

- Built an electricity load forecasting system combining machine learning and deep learning models.
- Pre-processed historical consumption, weather, and datetime data for predictive modelling.
- Trained and compared LSTM, XGBoost, and Random Forest models, selecting the best performer by evaluation metrics.

JobShala — MERN Stack Job Portal

MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Clerk Authentication

- Developed a full-stack job portal with separate dashboards for employers and job seekers.
- Implemented CRUD operations for job listings and enabled users to search, apply, and track job applications.
- Integrated Clerk authentication for secure user login and role-based access control.
- Used MongoDB Atlas for scalable database management and deployed a responsive UI using React and Tailwind CSS.

RESQ – Resource Optimization System for Food Waste Management

Python, Flet, SQLite

- Developed a food resource optimization platform to connect restaurants with orphanages and shelters.
- Implemented an auction-based allocation system for surplus food and ingredients to reduce food waste.
- Designed an intuitive interface for efficient food donation management and real-time resource allocation.

File Upload Validator — Secure File Upload Scanning Tool

Python, Magic-Byte Signature Detection, Archive/Zip Inspection, ClamAV (optional)

- Built a layered file-upload validation tool detecting disguised executables, path traversal, and embedded scripts before upload acceptance.
- Implemented magic-byte content sniffing to catch extension spoofing and flag mismatches between declared and actual file type.
- Added archive inspection for zip-slip path traversal, compression-ratio-based zip bomb detection, and Office macro detection.

EDUCATION

M.Tech, Computer Science and Engineering (Cyber Security)

2025 – 2027

School of Engineering, CUSAT

B.Tech, Computer Science and Engineering

2021 – 2025

Ahalia School of Engineering and Technology | CGPA: 7.22

LANGUAGES

English, Hindi, Malayalam
